Best Home Builder

With 26 years of experience in residential construction, Todd Glowka began his career building in the Lakeway and Austin areas, where stringent building standards shaped his approach to construction. He brings that same commitment to quality to every home he builds in the Texas Hill Country. With a particular focus on building science, Todd approaches each home as a complete system, carefully considering performance, comfort, efficiency, and durability to create an exceptional environment for his clients to live in.

The 7-member team at Todd Glowka Builder believes exceptional homes are built through exceptional collaboration. They remain personally involved from the earliest stages through completion. This level of involvement creates a seamless building experience defined by thoughtful communication, meticulous attention to detail, and genuine care for clients.

As a team, they have over 100 years combined experience in the luxury homebuilding industry and have won over 95 industry awards across local, state and national levels.

Active projects are limited to just 6 to 8 homes at a time. This allows the team to provide a personal, white-glove experience. Project Managers have the time and attention to oversee every detail. Clients receive assistance in the earliest stages of their project - from selecting the right property and assembling the ideal design team to guiding them through the planning and pre-construction process. The result is a more seamless building experience and a home that is thoughtfully considered from the start.

"Thanks for voting us Best Home Builder!" Glowka said.
